

# UNLOCK THE TREASURE....

*A litter of historic importance*

"The consistency with which a dog transmits given attributes to his offspring is a mark of the purity of his genes which determine them. This prepotency for desirable traits of the breed is the very essence of what we must find in a stud dog. Having found it and mated the dog to a bitch equally prepotent for the desirable traits, the results can never be in doubt."

Kyle Onstott,  
The Art of Breeding  
Better Dogs, 1946  
(Howell Book House, Inc.)

# FOR THE ...FUTURE

*28 years  
after his  
death...*

TOBY is still a major factor in this breed. His prepotency for the desired characteristics of the Portuguese Water Dog make him a *progenitor par excellence*.

LADYBUG, who possesses the same characteristics, is the perfect choice to complement and build on the qualities which create a true-to-type Portuguese Water Dog.
